What is your impression of the difficulty of the quizzes conducted during tutorial sessions? Were the problems consistent with the material presented in class?

Comment
We didn't have quizzes
We were never issued quizzes during tutorial. Problems taught during class were relevant with material taught in class lectures.
Yes.
Challenging at times but appropriate
A bit difficult, but he always made sure to help out. Yes, they were consistent.
No quizzes in this sections, however at times the handout problems were consistently challenging.
For the most part I would say they were.
Decent and managable

Comment

Mohammed was a fantastic TA! Probably the only reason I will pass this class. He taught the material in a way that was incredibly easy to understand compared to lecture. Great instructor!

Mohammed is a wonderful TA and he understands the students. Even the students from other TAs prefer his style of teaching. He makes it so we actually learn the material and are accountable for what we learn. He wants all of us to pass the class and helps us anyway he can. Personally, I feel like he is putting more effort than any other TA to help us learn. He is also making it very convenient for the students to access the work and turn it in. I am very lucky to have Mohammed Kaabar as my TA.

Best TA I have had the entire time I have been here at WSU. Mohammed always had a great attitude, was flexible with his schedule and was always there when needed. He came prepared every lab lecture day and did a great job of explaining things multiple ways. He did everything he could to ensure the success of all his students and was always encouraging

Mohammed Kaabar has such a great attitude, and you can right away see his enthusiasm towards helping/teaching his students. He always made sure that his students were able to understand the topics and be able to pass the exams.

A very skilled teacher in being able to explain steps in a simpler way or going about teaching different methods to solve a problem.

He was the most prepared and helpful teaching assistant that I have had in four years of undergraduate studies.
